

CSE 165: 3D User Interaction

Lecture #1: Introduction

Instructor

Jürgen Schulze, Ph.D.

Research Scientist at Qualcomm Institute

Adjunct Professor in CSE Department

Email: jschulze at ucsd.edu

Office: Atkinson Hall, Room 2125

Office hours: Tuesdays 3:30-4:30pm

Course Staff

- TA: Jimmy Ye
- Tutors: Weichen Liu, Ziyang Li
- See Piazza for office hours

Class Goals

- Provide in-depth introduction to spatial 3D user interfaces.
- Strengthen 3D graphics programming skills.
- Practice internet research and presentation skills.

Prerequisites

- CSE167 (Introduction to Computer Graphics) or equivalent
- Experience programming in C++ and OpenGL, or Unity 3D/Unreal Engine/Lumberyard
- You need to know how to debug code

Course Web Sites

- Course web site:
 - <http://ivl.calit2.net/wiki/index.php/CSE165W2019>
- TritonEd:
 - Grades and code/assignment submission
 - Wiki for video presentation scheduling
- Piazza:
 - Discussion boards for homework, etc.

Lectures and Discussion

- Lectures:
 - Tue/Thu 2:00-3:20pm in CSE B210
- Homework/midterm Discussion:
 - Mon 4-4:50PM in CSE B210
- Homework grading:
 - Fridays at 2pm in CSE B210

Assignment Submission on Ted

- Submissions are required for each homework project:
 - all source code and scripts you wrote
 - 3D models, textures, etc. that you created
 - No need to upload binary code or project files

Recommended Textbook

Bowman, Kruijff, LaViola, Poupyrev

3D User Interfaces: Theory and Practice

Addison Wesley Longman Publishing
Co., Inc. Redwood City, CA, USA
2004

ISBN: 0201758679

Class Structure

- Lectures
 - Fundamentals of 3D user interfaces
- 3 structured homework assignments
 - Solo projects
 - 2 weeks per project
- Midterm
- Final Project
 - Teams of two
 - 3 weeks
- Video presentation
 - Presentation (5 minutes), followed by short discussion

Grading

Project 1	15%
Project 2	15%
Project 3	15%
Final Project	25%
Midterm	25%
Video Presentation	5%

Cloud Storage

- Unless otherwise explicitly authorized, each student is completely responsible to keep their code, homeworks, design files and other course work off of publicly accessible internet sites.
- Example: it is not allowed to put code in a public Github repository.
- These rules expire after finals week.

Programming Assignments

- Two weeks per project, slightly more for final
- All projects involve 3D input devices, specifically Oculus Rift, Oculus Touch and Leap Motion
- First 3 projects are solo projects
- Final project: teams of two

Programming Assignments

- Operating system: Windows
- Programming environment:
 - Unity 3D (recommended)
 - C++ with OpenGL or OpenSceneGraph
 - Unreal Engine 4
 - Amazon Lumberyard
- Grading in CSE basement lab 210
- Programming assignments need to be demonstrated to course staff on due dates after 2pm
 - Grading queue managed by Autograder

Video Presentation

- Each student needs to present one video on an innovative 3D user interface from 2018/2019
- Submit your preferred presentation date, video title and link to TritonEd
- You have 5 minutes for the presentation
- Videos need to be accessible via a public URL so they can play off instructor's laptop (e.g., Youtube)

Late Policy

- Projects can be submitted up to 7 days late with a 25% penalty.
- Exceptions for documented extenuating circumstances only.

Permitted Software Tools

- Unity 3D, Unreal Engine, Amazon Lumberyard, Crytek CryEngine
- Visual Studio C++, GLFW, OpenGL, OpenSceneGraph
- Physics Engines: Bullet, PhysX
- Oculus SDK
- Leap SDK
- OpenVR
- OSVR
- 3D Modeling Tools (eg, Trimble SketchUp, Blender, Maya, 3ds Max)
- 3D model libraries (eg, Google 3D Warehouse)

Note on Slides

- Some of the lecture slides were originally created by Professor Joe LaViola (University of Central Florida), co-author of our text book
