

# CSE 165

# Discussion 6

---

Haoqi Wu

# Topics

---

- Oculus setup
- Project 3

# Oculus Setup

---

- Oculus App on PC: <https://www.oculus.com/setup/>
- Import Oculus integration in Unity:  
<https://assetstore.unity.com/packages/tools/integration/oculus-integration-82022>
- Download XR-plugins in Unity
- Tutorial video that might be helpful:  
<https://www.youtube.com/watch?v=YwFXQeBmxZ4>

# Demo

---

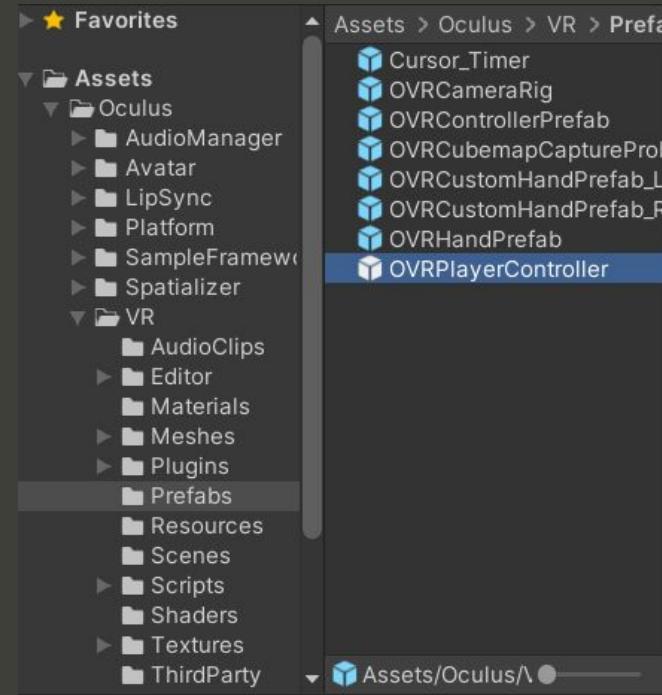

# Oculus Setup

---

- Wireless option: Setup wifi connections with Android Debug Bridge (ADB)
- <https://developer.oculus.com/documentation/native/android/mobile-adb/>

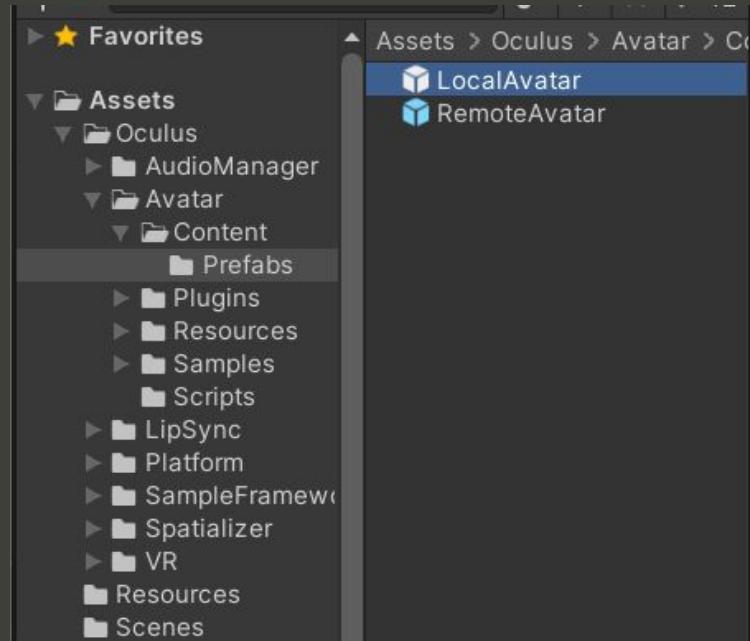

# Oculus Setup

- Use OVRPlayerController prefab for camera and player control
- OVRCameraRig is your VR camera

# Oculus Setup

- Use LocalAvatar prefab for hand display and controllers
- Place it under the tracking space of OVRCameraRig

# Input

---

- Get inputs from the controllers
- Use OVRIinput:  
<https://developer.oculus.com/documentation/unity/unity-ovrinput/>
- Check out the example usage in the link
- Example:  
OVRIinput.Get(OVRIinput.Button.One);  
Returns true if you are pressing “A” button

# Ray-casting

---

- Similar to the gaze in Project 1
- Draw lines using LineRenderer:
- <https://docs.unity3d.com/Manual/class-LineRenderer.html>
- Example:

```
LineRenderer lr = GetComponent<LineRenderer>();  
lr.SetPosition(0, rightHand.position);  
lr.SetPosition(1, rightHand.position + rightHand.forward * 100);
```

# Virtual hands

---

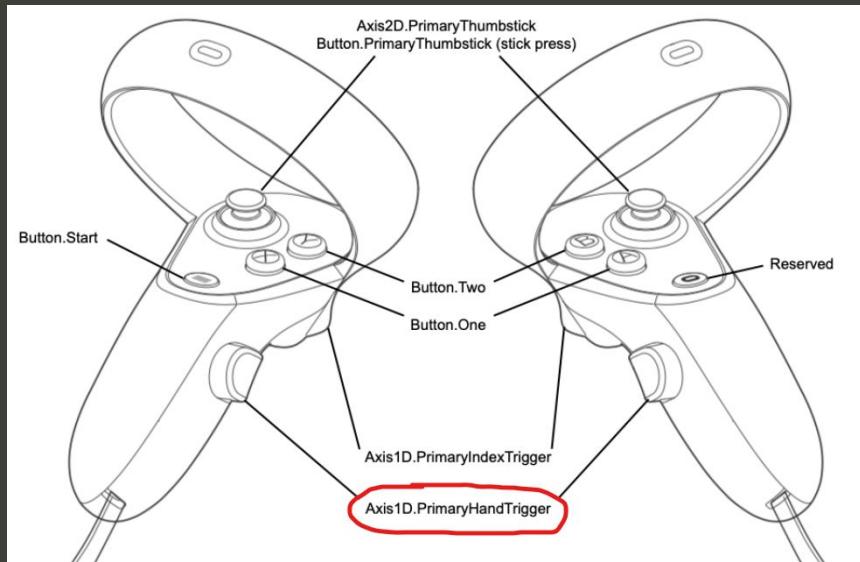

- Get the transforms of your hands from LeftHandAnchor and RightHandAnchor

# Grabbing the Air

---

- Use the hand triggers for grabbing
- Record the position when you press the button
- When holding the button, move the player by the difference in the hand positions

# Questions

---
